Highest Score	79%
Lowest Score	24%
Average Score	56%
Placement in cohort	15 out of 146 students
Placement among Boys	9 out of 64 Boys

Jibrael's Results

We have done some analysis against our mock in previous years in order to give you an indication of your child's placement within the cohort. As a benchmark, children who scored 63% and above had an excellent chance of securing a place at a grammar school. Those who scored between 54%-62% were borderline, so some children within this group secured a place and others did not. Only a few of the children who scored below 54% went on to secure a grammar school place. This is only an indication based on our previous experience and by no means a prediction.

Key
